

Product features:

- 1 2,8 gal metal tank
- 2 teflon tape
- 3 anti-leak sensor
- 4 reverse osmosis membrane 100 GPD
- 5 1/4" colour tubes
- 6 mineralizing filter
- 7 bioceramic filter
- 8 UV lamp
- 9 diaphragm pump

SET ELEMENTS: sediment filters 5 i 20 micr., carbon block, RO membrane: 100 GPD, inline carbon filter - coconut carbon media mineralizing filter, bioceramic filter, diaphragm pump, UV lamp, double faucet, tube - 1/4", 3/8" connection, 2,8 gal metal tank wrenches for membrane housing and filter housings.

Advanced water filtration system based on reverse osmosis technology. The system offers best water filtration for home use. The set contains high quality pre-filters, highly efficient and precise osmotic membrane as well as post-

filters. Each Actiwater sysem contains a complete accessories set with e.g. teflon tape, tube cutting knife and an anti-leakage sensor which cuts water supply in case of system failure.

Product technical details:

Membrane	100 GPD	
Tank	2,8 gal metal	
Water connection	3/8"	
Faucet	F2CF - double, chrome	
Work temperature	2 - 40°C	
Work pressure	2,8 - 6,0 bar	
Filter replacement	cartridges	every 6 months
	membrane	every 3 - 5 years
