

BB TECH

Water Filter Station with UV Lamp

A complete water filtration set for whole house or company, based on Big Blue housings (4,5" 10" and 20" high). The product can be mounted with a variety of cartridges. All housings are installed on a solid metal frame. The system additionally contains a UV lamp with 1,4 m3/hr. flow rate. All housings are equipped with double oring protection.

Set elements:

- 1 x transparent housing, 10"/20" height, 1" connector
- 2 x blue housing, 10"/20" height, 1" connector
- metal frame
- 2 x manometer
- wrench for housing
- 3 x green centring ring
- teflon tape roll (6,0m x 12mm x 0,1mm)
- 4 x levelling feet screw
- complete UV lamp set LPV6T

* Each set contains centring rings which stabilize the position of the cartridge in the housing and also ensure its stable and efficient operation.

Example cartridges:

* The cartridges are not included in the set and need to be purchased separately.
