Berg Softeners

 Multi-language menu,
 touch interface

Modern design, stable work

A compact softener dedicated for home or small company use. Controlled by a clear LCD screen with a user-friendly, multi-language menu. The valve is protected by firm locking clips. The softener offers: stable operation, access to water during regeneration (thanks to the built-in by-pass) and small water consumption.

 Connectors, transformer
 and by-pass included in the set.

Salt inlet

Berg MODEL 20L-25L

Capacity: up to 2500 L/h

Dimensions: 335 * 335 * 1045 mm

Berg MODEL 15L

Capacity: up to 1500 L/h

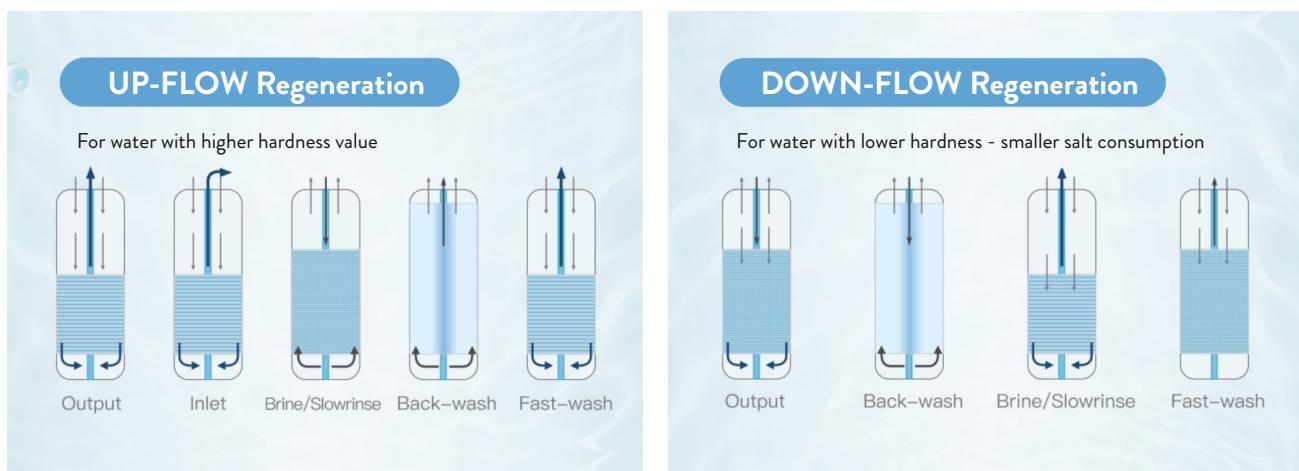

Dimensions: 335 * 335 * 775 mm

Technical specification:

Inlet water: municipal
 Inlet water pressure: 0,15 - 0,5 Mpa
 Inlet water temperature: 2-40 st. C
 Power: 100-240 V, 50-60 Hz
 Connection: 3/4"
 Regeneration mode: adjustable
 Regeneration time: ca. 60 min.
 Drain: 3/8"

Regeneration modes:

Connection height:
80 cm
 (25L type)
 from floor level

Distance between connectors:
 8 cm

appliance protection

longer lifespan of furnace, radioators, no stains and residue on installation elements and appliances

less chemicals

smaller consumption of cosmetics and cleaning materials

save money

short regeneration cycles equals less water consumption
